Food...

Because of varied individual preference, we recommend that you make your own food list.

1—Make menu for each day of trip—this can include fresh meat for first few days. Most fruits and vegetables will keep ten days or more. Many people crave sweets more when in the mountains.

2—Prepare exact shopping list of quantities indicated by your menu. Don't forget to provide for your packer for the time he is with you.

3—Bring canned and bottled goods separated from soft packaged items and perishables. Leave eggs in grocer's cartons.
